PATIENT SPOTLIGHT: CARLOS' HOMEMADE TREATS

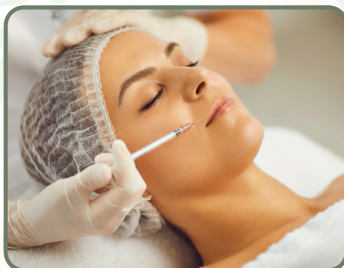

We are so grateful to our friend, Carlos, who surprised our entire office with his incredible homemade banana bread and the most refreshing tamarind iced tea. Both were absolutely delicious and gone in no time! If you'd like to order some of his specialties for yourself, you can reach Carlos at 347-299-7235.

SWEET SURPRISE AT THE OFFICE

A big thank-you to our thoughtful patient who treated the staff to a box of donuts! The goodies were enjoyed by everyone, and even our tiniest cutest visitor that day! Moments like these make our office feel extra warm and special.

🔗 EGFR CHEMO ACNEIFORM RASH: A RASH THAT LOOKS LIKE ACNE (BUT ISN'T)

A DERM DIARIES DERMATOLOGY CASE

Our patient today is a woman in her early 60s undergoing treatment for metastatic colon cancer. Two months ago, she began panitumumab, an epidermal growth factor receptor (EGFR) inhibitor. About two weeks after her first infusion, she noticed a mild acneiform eruption on her chest. With each subsequent chemotherapy cycle, the rash worsened and spread to her face. More recently, she developed severe dry skin and eczema that became secondarily infected, requiring hospitalization for systemic antibiotics and steroids.

🔗 KEY TAKEAWAY

Skin conditions can be a sign of underlying health issues. Consulting a dermatologist is key for proper treatment and evaluation.

Disclaimer: These are real patient cases shared for educational purposes with express written consent. All patient images and stories are the property of Dermatology Solutions and may not be reproduced or distributed without permission.

For more information on this diagnosis, treatment, and the patient's journey, check out the full story on our Derm Diaries page linked.

🔗 NEW SERVICE SPOTLIGHT: PDT FOR AKS

We're excited to now offer Photodynamic Therapy (PDT), for the treatment of Actinic Keratoses (AKs)—precancerous skin spots caused by long-term sun exposure. PDT is a light-activated treatment that specifically targets abnormal cells while leaving healthy skin untouched. It's effective, minimally invasive, and comes with little downtime.

Here's one of our patients after treatment with a protective hat for his scalp to stay safe from the sun while healing.

Ask us if PDT might be the right option for keeping your skin healthy and cancer-free!

🎃 OCTOBER COSMETIC SPECIALS
